

The End

The event has concluded. Thank you to all who participated, we had made quite the colorful selection. Over the four months, we had submitted 13 programs, from games to operating systems, and made the 5150 a nicer daily driver than before. Next time, maybe in 2026. The following is a public gallery of submissions, in order from most to least recently submitted. All are downloadable and can be run easily with a either an MS-DOS or a generic PC emulator.

[Matrix](#)[5150 Doom, kinda](#)[Roto8088 by Optimus](#)[MNDL5150](#)[EttinOS](#)[Spread!](#)[8088ify](#)[sprite for MS-DOS](#)[Tetris Attack](#)[Nyan Cat v1.0](#)[Small C Compiler](#)[Toledo Atomchess](#)
